In November 2019, the Ministry of Health Malawi finalized the adaptation of the Quality of Care standards for maternal and newborn health and pediatric care. In 2020, the Ministry of Health developed quality improvement assessment tools to enable health facilities to report on the adapted standards. The QI assessment tools are comprehensive and use a scoring method on each standard to measure how each facility is fairing.

This webinar will share the Ministry's experience in developing and in implementing the QI assessment tools and share lessons learned in this process.

Speakers:

- **Dr. Malangizo Mbewe**, Quality Management Directorate, Ministry of Health and Population Malawi
- **Seleman Kondowe**, Senior Quality Management Officer, Quality Management Directorate, Ministry of Health and Population Malawi

Facilitator:

- **Martin Dohlsten**, Technical Officer, Maternal, Newborn and Child Health, World Health Organization HQ

The webinar is co-hosted by the Network for Improving Quality of Care for Maternal, Newborn and Child Health and the QoC subgroup of the Child Health Task Force, with the support of the World Health Organization.
